

Multiple Use Tow Tractor by ScoringAg

New dual electric or solar powered Tow Tractor is an electronic marvel and handles more than one job and built to be used in Greenhouses and Nurseries. The environmentally friendly new Multiple Use Tow Tractor by ScoringAg is the answer for many issues the industry is facing now.

Shortage of labor requires response to mechanization and efficiencies in Greenhouses and Nurseries.

The affordable 4-tire Multiple Use Tow Tractor for Greenhouses and Nurseries is only 38 inches / 96.62 cm wide with front and or rear hitches and can have a set of optional pusher bars.

This new Tow Tractor has zero pollution and requires no oil changes, no warm-up time with plenty of power and a set of lights and reflectors for working in dim light conditions of greenhouses.

Driven by an 18-horse-power, 36 volt electric fan-cooled drive motor, these tractors are work horses. A brilliant addition to the electric tractor is the on-board, three-bank smart charger that helps prolong battery life. There is even an option for solar charging the batteries! For about a dime's worth of local electricity, just plug it in and be fully charged in about eight to ten hours. The 6 heavy duty, 6-volt deep cycle marine-type batteries weight is balanced on the tow tractor frame for maximum traction. For food safety concerns, the tractor can be sanitized and wiped down to prevent plant disease migration and prevent foodborne pathogens.

This new Tractor enables any Greenhouse or Nursery operator to transport rapidly any load on wheels with no physical effort.

Available attachments for cleaning, power broom sweeping, leaf vacuuming and plant spraying as well as light or heavy towing covers some of the many chores of a greenhouse operation. An attached hand tool storage rack makes the job easier too.

An on-board 2,000-pound winch provides power for lifting attachments, or sliding equipment into place. Tractor weighs just at 900 pounds, or about 408 kilograms including the heavy-duty batteries. The Multiple Use Tow Tractor by ScoringAg is rugged and quick and handles electric support equipment like electric scissor lifts with its front and rear electric outlets.

These Multiple Use Tow Tractors are built in the USA for ScoringAg to address the daily needs in the Greenhouse and Nursery Industry no matter the size.
