

Multiple Use Garden Tractor

New dual electric or solar powered Garden Tractor is an electronic marvel and handles more than one job and built to be used in Greenhouses and Nurseries and Small Farm Market gardens.

The environmentally friendly new Multiple Use 'Cyber Clydesdale' is the answer for many issues the industry is facing now. Shortage of labor requires response to mechanization and efficiencies in Greenhouses, Nurseries, and Small Farm markets.

The affordable 2W tire Multiple Use 'Cyber Clydesdale' for Greenhouses and Nurseries is only 27 inches wide on the tires inside / 12 inches ground clearance with front and or rear hitches. This new 'Cyber Clydesdale' has zero pollution and requires no oil changes, no warm-up time with plenty of power and a set of lights and reflectors for working in dim light conditions of a greenhouse.

Driven by two electric drive motors, these tractors are work horses. A brilliant addition to the electric tractor is the on-board, smart charger that helps prolong battery life. There is even an option for solar charging from the batteries! For about a dime's worth of local solar electricity, just plug it in and be fully charged in about 1 to 4 hours.

The battery weight is balanced on the 'Cyber Clydesdale' tractor frame for maximum traction. For food safety concerns, the tractor can be sanitized and wiped down to prevent plant disease migration and prevent foodborne pathogens.

This new 'Cyber Clydesdale' Tractor enables any Farmer, Greenhouse or Nursery operator to transport rapidly any load on wheels with no physical effort. Available attachments for cleaning, cultivation, power broom sweeping, leaf vacuuming and plant spraying as well as light or heavy towing covers some of the many chores of a greenhouse or small farm operation.

An attached foot rack when riding makes the job easier too. Tractor weighs just at 100 kilograms including the heavy-duty battery. The Multiple 'Cyber Clydesdale' Tractor by is rugged and quick and handles electric support equipment like electric scissor lifts with its front electric outlets.

These Multiple 'Cyber Clydesdale' Tractors are built for the Agriculture food Industry no matter the size
